Hi Dante,

I received your voice mail explaining ROD reviews and delays.
I don't see a problem since BLM was going to require more time than EPA HQ anyway; so, as long as they can get started without the remaining EPA comments included, I'm fine with that. I have alerted Greg and Jeff to this as well.

Also, as I was going back over the latest NDEP version I gave you last week I found a few more instances of "evaporative soil cover" that I had intended to change to just "cover" to allow for more flexibility in cover material and composition, as well as thickness, during design phase discussions.

So, I'm attaching a slightly revised version that includes those few changes.

Let me know if you are able to incorporate those easily, or have questions.
I'm in a meeting all afternoon, but have some time available tomorrow afternoon.

Thanks,
Jeryl
